GRADUATE PROTOTYPE REPORT FIELDS (DRAFT - 29May14)

This report is meant to be a "window" to see what data and documents are available in Banner/BDMS. It is new and relatively untested. Do not use data on the report for final decisions. Use the GAR, Banner or the actual document in BDMS for actionable data.

This report only shows what information has been reported on the proper screens in Banner and what documents have been accurately labeled (indexed) in BDMS. If an applicant is missing an item that you think should be in the system, it is possible that is mislabeled in BDMS or can be located elsewhere. Please contact the applicant to see if the item has been sent and report missing (but expected) items to your admissions advisor.
